

TECHNALO & GRAFCUBE RGB

The power of graphite fused with the magic of water-soluble colour

Caran d'Ache is reinforcing its Graphite Line range with a new generation of graphite. The new Technalo RGB and Grafcube RGB – named after the famous Red, Green, Blue coding system – fuse the power of graphite with the magic of colour to create exceptional effects: 2-in-1 tools that combine the qualities of a colour pencil with water-soluble lead and a graphite pencil to meet the discerning requirements of artists and creative professionals.

Used dry, these media retain the original properties of graphite. In contact with water, the black is tinted with subtle shades of carmine lacquer (575), dark phthalo green (719) or Prussian blue (159) for unique renderings. These innovative tools offer new creative dimensions with the promise of exceptional lightfastness.

Technalo RGB and Grafcube RGB products are available individually and in multi-technical sets that include water-colourable art tools and essential accessories offering ultimate on-the-road convenience.

GRAPHICOLOR

For taking notes, correcting and highlighting

Caran d'Ache has developed the new Graphicolor Pencils for editing your paperwork.

Graphicolor Red is a two-tone pencil with an HB graphite lead at one end, ideal for noting ideas, information, thoughts and remarks and a Prismalo red lead at the other end to emphasize corrections to be made.

The Graphicolor Fluorescent Yellow is also a two-tone pencil with an HB graphite lead at one end and a fluorescent yellow lead at the other that can be used to highlight and emphasize important information.

The ideal pencil for teachers, students and professionals looking for a simple, multifunction marking tool.
